Objective

I am a highly motivated, self-starting, and detail-oriented Front End Software Engineer with experience in RESTful Api and AGILE methodologies. I'm looking to transfer my skills in communication and client relations into a Front End role.

Tech Stack

CSS, HTML, React, Figma, Git, AWS, Heroku, Surge, MongoDB, PostgreSQL, Node, Express

Work Experience

InvestCloud

Front End Software Developer | June 2021 - Present

- Work with the design team and design tools (Figma) to deliver new screens
- Produce interactive digital interfaces using InvestCloud's declarative programming platform
- Adhered to AGILE and contributed to idea-generating team sessions
- Updated existing products with thematic CSS to produce custom web apps for clients
- Managed user inputs with *PWP Context* (similar to REACT state management)
- Created reusable button, form, and navigation components to streamline future developments

Atini Studio Inc.

Junior React Front End Developer | January 2021 - June 2021

- Developed single page apps for clients in sporting, finance, and retail
- Produced custom landing pages based on Figma designs using React, HTML, CSS

Personal Projects

Ploober

Mobile application designed to simplify hiring a local plumber.

- Combined Yelp API with iPhone geolocation to populate a list of nearby plumbers.
- Secured login and sensitive user information through JWT and bCrypt.
- Designed a consistent statement management system using React Hooks.
- Cross collaboration with Product and Design team.

Education

Hack Reactor | Advanced Software Engineering Immersive Program

October 2020 - January 2021

University of California, Irvine

August 2009 - December 2014
